

We have extensive OEM and licensing capabilities, from turn-key manufacturing to IP and technology licensing. We offer full product design, research and development, prototyping, and consulting services.

We have the following in-house capabilities that are done in our own Austin, TX based facility.

- Full Product Design; 3-D CAD, Industrial Design
- Embedded Software
- Rapid Prototyping
- Circuit Board Design
- Electrical Engineering
- Rubber Keypad Design
- Mac/Windows Software Design
- GUI / Interface Design
- Manufacturing
- Sourcing, R&D, and Partners for Mass Manufacturing

The following products are a few examples of our OEM efforts.

Enlighten DMX Controller

Enlighten DMX Lighting controller is specifically designed for Stage Lighting Control. With an easy to use system of creating buttons as looks or sequences, Enlighten gives you the power and flexibility you need. Using the Enlighten Control wing will enable you to get hands on control of your stage.

Livid Instruments exclusively developed and manufactures the Enlighten DMX Controller in Austin, TX for Mega Systems Inc. www.mega-lite.com

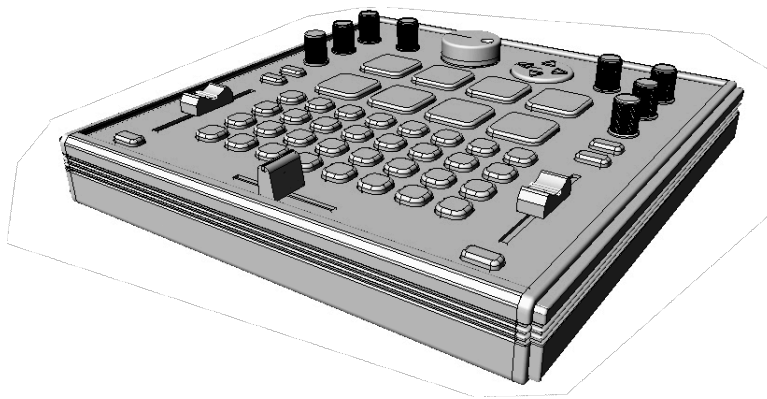

Music Computing StudioBlade™ & iKey Dock™

The StudioBlade from Music Computing is a full music production studio with a computer, touch screen, keyboard, DAW controller, software, and I/O. The iKey Dock is a keyboard, DAW controller, audio I/O, and dock for a laptop computer.

Livid Instruments exclusively developed and manufactures the DAW controller and enclosure in Austin, TX for Music Computing Inc. www.musiccomputing.com

Electrix Tweaker

The Tweaker from Electrix is an OEM licensed product designed for Mixware and slated for a 2011 release. This controller features velocity sensitive drum pads, a button grid, channel strips and a crossfader. Designed from extruded aluminum with the classic Electrix body style.

Livid Instruments fully designed and developed the Tweaker and it licensing the technology for overseas mass-production.
